Water at the Summit Bechtel Reserve

Water at the Summit Bechtel Reserve is not only plentiful but is important in the sustainability of the property. Here are a few ways we not only use but conserve and recycle water on property.

A few facts about water at the Summit and the 24th World Scout Jamboree

- ***To protect the environment and conserve water usage***
 - o Rainwater run off the Summit has a network of 60 acres of swales and rain gardens to treat runoff by filtering it through plants. This is designed to help prevent excessive runoff and erosion.
 - o Low flow fixtures cut typical water consumption in half, these fixtures are used in both the sinks and the showers throughout the Jamboree site.
 - o Water is stored in a 2 Million Gallon Tank and a 6 Million Gallon Tank to provide fresh and readily accessible water for the World Scout Jamboree.
 - o Hydration Stations encourage reusable water bottles.

- ***Gray water systems (Water that has already been used)***
 - o Composting Toilets are used to help support sustainability.
 - o Gray water from showers and sinks is recycled to be used to flush toilets.
